

Control Solutions for Modern Fan Co. Products with AC MOTORS

In order to run your fan at various speeds and to operate the light (if selected) independently of the fan, you will need to choose an appropriate control. Modern Fan control selections are incorporated into the fan configuration at time of order. These Modern Fan Co. controls are designed and intended for operation of a single fan (or fan and light). Refer to Installation Manual for wiring diagrams and additional instructions.

Fan Speed Control (no light)

For a single AC motor fan, providing speed selection. Not intended for a fan with light.

Note: Not compatible with remote control.

Fan Speed & Light Control (3 Wire)

For a single AC motor fan with LED light, providing speed selection and dimming function.

Requires three wires from switch location to fan (two hot wires and a common neutral) to separate fan and light functions.

Note: Not compatible with remote control.

Handheld Remote Control (2 Wire)

Designed for independent operation of a single AC motor fan or AC motor fan with LED light, providing speed selection and full range dimming (or “on/off” switching), using only one circuit (two wires). Includes RF (radio frequency) handset, RF receiver, battery and comes with a wall mounting bracket for handset. Handset must be “paired” with receiver upon installation.

Fan Speed & Light Control (2 Wire)

Designed for independent operation of a single AC motor fan with LED light, providing speed selection and full range dimming (or “on/off” switching), using only one circuit (two wires).

Includes RF (radio frequency) wall control with master power switch, switch plate and RF receiver. Wall control must be “paired” with receiver upon installation.

Wall Control with Remote Handset (2 Wire)

Designed for independent operation of a single AC motor fan or AC motor fan with LED light, providing speed selection and full range dimming (or “on/off” switching), using only one circuit (two wires). Includes RF (radio frequency) handset, battery, RF (radio frequency) wall control with master power switch, switch plate and RF receiver. Handset and wall controls must be “paired” with receiver upon installation.

Many Modern Fan Co. products have undergone technical and mechanical changes over the years which may affect fan control compatibility. The above solutions represent our current offering and may not be fully compatible with fans which were sold in the past. To replace lost or damaged control components or to add secondary control to existing control sets, contact Modern Fan Co. customer support (888-588-3267) for guidance.
